

BATTERY CASING ABUSE

"First Battery only warrants that this Battery is free of defects in material and workmanship under normal use and service conditions and in terms of correct application." Thus using batteries for any other purpose than the correct application will void the warranty. Battery casing and Posts can give a good indication as to the use and abuse of the battery.

CRACKED OR SPLINTERED CASING

Cracked or splintered casing indicating excessive exterior forces not consistent with the correct application the battery was intended for.

EXCESSIVE DOWNFORCE

Damage casing around the post due to excessive down force causing internal damage to the plates and inner post.

BULGING CASE

Bulging casing indicating signs of overcharging, faulty alternator, over/undercharging, incorrect or faulty external charger and/or battery left uncharged for extended periods then charged.

TAMPERING WITH FILER CAPS

Removing battery labels, missing filler caps and tampering, opening the filler caps violates the warranty terms and conditions.

LEAKING OR DAMAGED BATTERY

Leaking or damaged battery casing indicating excessive exterior forces not consistent with the correct application the battery was intended for.

EXTERIOR DAMAGE

Damage caused to the exterior of the casing resulting from sudden impact, dropping, bumping can damage or shift the battery plates inside and is not acceptable.

EXTERNAL HEAT SOURCE

External heat source causing damage to the casing indicating battery abuse. The use of the battery for purposes other than what it was intended for violates the terms and conditions of the warranty.

BATTERY NOT PROPERLY SECURED

Battery not properly secured in the vehicle resulting in damage to the casing can cause excessive vibration that leads to internal damage and is considered a violation of the warranty terms and conditions.

TAMPERING WITH CODING

Tampering with the battery coding and markings to the extent of removing and/or modifying it, will be a violation of the warranty terms and conditions.
