

PERFORMANCE YOU CAN TRUST

SUPERIOR
fully framed

Did You Know?

First Battery products – Exide batteries – are made on the same production line as OEM batteries for top vehicle brands like VW, Nissan, Isuzu, Ford, BMW, MAN, and more!

That's right! The same trusted technology powering leading automotive brands is available to you, delivering unmatched reliability, durability, and performance.

The First Battery Difference

- ✓ Superior Grid Design – Our tree/radial grid structure optimizes current flow for enhanced conductivity and a longer-lasting battery.
- ✓ Advanced Lead Alloy Composition – Reinforced with calcium, tin, and silver to improve corrosion resistance and casting quality, ensuring reliability you can count on.
- ✓ **Precision Casting for Maximum Performance:**
 - Positive Grid – Gravity-Cast "Tree Design" Engineered for strength and longevity.
 - Negative Grid – Radial/Tree Design (Continuous Casting) Ensures uniformity and high efficiency.

The Result?

- Stronger performance
- Superior durability
- Increased energy output

It's this technology that makes vehicle manufacturers trust First Battery as the First Fit battery in your car. Exide batteries are even manufactured on the same production line as OEM batteries in our East London factory, trusted by brands like VW, Nissan, Isuzu, Ford, BMW, MAN, and more.
